Free Screenings
Follow-up Care & Navigation Assistance

Happy New Year! Are you wondering why BCCCNP is requesting screening and/or testing results by fax every two weeks?

Every two weeks BCCCNP runs a billing report. This report provides information regarding services that have been billed, but are not authorized for services.

In order for claims to be authorized for services, we must receive the screening forms and/or test results.

If services are not authorized within 30 days of being billed, patients are often billed. By authorizing services in a timely manner, we eliminate a lot of frustration for our patients.

Thank you for your continued support and cooperation to ensure that we are billing appropriately.

Friendly Reminder: Important Billing Deadlines Approaching (See page 9)

January is Cervical Cancer Awareness Month

Michigan 2015 Cervical Cancer Projections

- It is estimated that there will be 350 cases of cervical cancer
- It is estimated that 120 women will die as a result of cervical cancer

January is Cervical Health Awareness Month

Cervical Health Awareness Month is a perfect time for you and your family to know the following life-saving information:

- **The Pap test:** Talk with your doctor and stay current on cervical cancer screening – women should begin screening for cervical cancer at age 21. The Pap test is the simple and affordable screening test to detect cervical cancer – still, more than half of cervical cancer deaths are seen in women who have either never had a Pap test, or have not had testing in more than five years.

- **HPV vaccination:** Children should receive all three doses of the HPV or anti-cancer vaccination. Experts say that the Human Papillomavirus or HPV vaccination can prevent about 70% of cervical cancer cases in the United States. HPV vaccination also prevents other cancers in both women AND men.

**To reduce the risk of cervical and other cancers, you can:**

- **Be screened.** Talk with your health care provider. Also, women’s preventive health care – such as screenings for cervical cancer, prenatal care, mammograms, immunizations, and other services – is covered through the Healthy Michigan Plan without co-pays. Pap tests are available at Family Planning Clinics and for women ages 40-64, Pap testing is accessible through the Breast and Cervical Cancer Control and Navigation Program (BCCCNP). For more information about the BCCCNP, call 800-922-MAMM (6266).

- **Make sure your children receive the HPV vaccine**
  - Talk with your children’s doctor; it is recommended for girls and boys at 11-12 years of age. However, the vaccine can be given up through age 26.
  - It's given in a series of three doses.
  - The HPV vaccine is safe, effective, and produces better immunity when given at the recommended age of 11-12 years.

**Resources:**
Vaccines for Children (VFC), Medicaid, MI-Child, and most health insurances pay for the HPV vaccine. If your child does not have health insurance, or does not have insurance that covers these vaccines, ask your health care provider or local health department about the VFC program. VFC provides no-or-low cost vaccines to eligible children, 18 years of age and younger.

For HPV and cervical cancer information, visit [www.michigan.gov/hpv](http://www.michigan.gov/hpv) and [www.michigan.gov/cancer](http://www.michigan.gov/cancer). More information about vaccinations in general can be found at [www.michigan.gov/teenvaccines](http://www.michigan.gov/teenvaccines).
Ready-to-Use Data on Cervical Cancer

Quick Data
- U.S.
  - It is estimated that 12,900 cases of cervical cancer will occur in 2015
  - It is estimated that there will be 4,100 deaths from cervical cancer in 2015
    Source: American Cancer Society Facts and Figures 2015
- Michigan
  - Incidence
    - In 2012, the age-adjusted cervical cancer invasive incidence rate in Michigan was: 6.1/per 100,000
    - There were 313 cases of invasive cervical cancer in 2012
  - Mortality
    - In 2013, the age-adjusted cervical cancer mortality rate in Michigan was 2.17/per 100,000
    - In 2013, there were 128 deaths due to cervical cancer
      Source: Michigan Cancer Surveillance Program – readily available Michigan and county-level data

2015 Cervical Cancer Projections
- It is estimated that there will be 350 cases of cervical cancer
- It is estimated that 120 women will die as a result of cervical cancer
  Source: American Cancer Society Facts and Figures 2015

Health Disparities
- The age-adjusted incidence rate of invasive cancers of the cervix in the year 2000 was 8.3 for White women and 12.2 for Black women – a 47% rate difference. In 2012, the age-adjusted incidence rate was 5.9 for White women and 7.2 for Black women – a 22% rate difference (rates are computed by the direct method and are age-adjusted to the 2000 U.S. standard population. Rates are per 100,000 population in the specified group).¹
- The overall 5-year relative survival rate for cervical cancer among African American women is 59%, compared to 69% among white women. African American women remain nearly twice as likely to die from cervical cancer as white women. Higher death rates among African American women have been largely attributed to socioeconomic disparities and a lack of access to care. It has been estimated that as many as 80% of deaths from cervical cancer could be prevented by regular screening coupled with adequate patient follow-up and treatment.²
- Women less likely to receive cervical cancer screening within the past three years include those who are uninsured and women between the ages of 21 and 29 years.²

• As parents, you do everything you can to protect your children's health for now and for the future. Today, there is a strongly recommended weapon to prevent several types of cancer in your kids: the HPV vaccine. [Find out more](#)

• January is Cervical Health Awareness Month. The most important thing you can do to help prevent cervical cancer is to have regular screening tests starting at age 21. If your Pap test results are normal, your chance of getting cervical cancer in the next few years is very low. For that reason, your doctor may tell you that you will not need another Pap test for as long as three years. Learn more about Pap test recommendations here: [http://goo.gl/SQ0hT0](http://goo.gl/SQ0hT0)

• Attention clinicians! CDC and partners, including the American Academy of Pediatrics, recommend HPV vaccination of both girls and boys at ages 11 or 12 and suggest that clinicians strongly recommend HPV vaccination for preteens and teens who have not yet been fully vaccinated. Read more: [http://goo.gl/5Ze0ka](http://goo.gl/5Ze0ka)

• Current vaccination and screening recommendations include that both girls and boys ages 11 to 12 should receive all doses of the HPV cancer prevention vaccination and girls ages 13-26 and boys ages 13-21 should get the vaccine if they have not received it already: [http://goo.gl/zrShVP](http://goo.gl/zrShVP)

• If there were a vaccine against cancer, wouldn't you get it for your kids? The HPV vaccine is cancer prevention. Talk with your doctor. [More information](#)

Direct Services, Caseload Closeout and Claim Submission Deadlines

Below are some important dates to keep in mind for the close of Fiscal Year 15 (FY15). This year the dates will remain firm and no exceptions will be granted after 3/18/2016.

LCA Deadlines:
• Data Entry deadline for LCA FY15 Client Caseload – 11/13/2015
  ▪ Client enrollment/data and at least one complete service must be entered into MBCIS for client to count towards FY15 caseload
    ■ New client enrollment/data may be entered between 11/14/15 and 12/31/15, but your agency will NOT receive coordination dollars for such cases
  ▪ All MBCIS data entry for services that will generate new FY15 client cycles must end by 12/31/2015.

• Authorization for FY15 services – 3/18/2016
  ▪ All FY15 services must be entered in MBCIS and authorized to be paid (Pay Box checked) by 3/18/2016
    ■ Services entered and/or authorized after 3/18/2016 will not be eligible for payment

Provider Deadlines:
• Billing for FY15 Claims:
  ▪ ORIGINAL (1st time) claim submission - 01/15/2016, including claims awaiting primary insurance
    Explanation of Benefit’s (EOB’s) and Case Management awaiting Nurse Consultant’s authorization
  ▪ Any original FY15 claims received after 01/15/2016 will be rejected with the hold code “N5” (prior fiscal year) and/or adjustment code “29” (timely filing)
  ▪ Resubmission of CORRECTED claims - 3/18/2016
    ■ Any FY15 claims received after 3/18/2016 will be rejected with the hold code “N5” (prior fiscal year) and/or adjustment code “29” (timely filing)

If you have any questions, please contact Tory Doney at 517-335-8854 or DoneyT@michigan.gov.
