Why is Smoking Dangerous?

Here are some facts to consider about tobacco and smoking.

✓ For every 5 deaths per year in this country, at least 1 is due to smoking.

✓ Smoking causes 9 out of 10 (90%) cases of lung cancer

✓ Smoking causes nearly all cases of chronic obstructive pulmonary disease (COPD, chronic asthma/bronchitis or emphysema).

✓ Smokers are twice as likely to die from stroke or heart attack, compared to non-smokers

✓ Smokers miss more days of work than non-smokers

✓ Smoking is also a risk factor for cancer of the mouth, throat, stomach, pancreas, kidney, bladder, cervix, liver, esophagus, uterus, colon, and leukemia

Tobacco addiction is the most common addiction in the United States.
